About

Self taught computer science enthusiast, i've been working since i was 17 years old and learning new stuff every single day of the past ten years, I am truly proud of work that i've done on some big projects concerning network security, network optimization, private clouds, Real-Time Distributed Programming, and much more very big projects in regards to iran Infrastructure

May the forth be with you! Such an...

Datacenter optimization taken to extremes!

IEEE · April 22, 2022

Just to keep it short its not about the OEM hardware from big companies that makes a DC reliable and highly available and ready for software driven next generation of datacenters, i have been doing my homework on how a lot of big names in the industry do it successfully in order to replicate those factors in our dear country iran and to move forward from the basic stuff that we've been doing in regards to building, monitoring and maintaining a modern software driven datacenter with exceptionally...
